Pearl Total Return Fund

Pearl Total Return Fund's 10-Year Performance Record is summarized in this graph:

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT IN PEARL TOTAL RETURN FUND AND ITS COMPARISON INDEXES *

(as of 3-31 each year — with dividends reinvested)

* The Fund's total returns in this report, including the graph and tables, do not reflect the deduction of taxes that a shareholder would pay on Fund dividends or on redemption of Fund shares. Likewise, the total returns of indexes do not reflect the deduction of taxes that an investor in stocks would pay on dividends or on sale of stocks.

* **All Pearl Funds total returns are net, after deducting all expenses** (all fees, transaction costs, etc.) — including all expenses of the Fund and all expenses of all the mutual funds in the Fund's portfolio. In contrast, the total returns of indexes do not reflect any deduction of expenses.

- Through March 31, 2010, the value of an investment in **Pearl Total Return Fund** grew **20.33%** during the last 5 years and **grew 72.26%** over the last 10 years. (not annualized)

Performance of Pearl Total Return Fund and Comparison Indexes through 3-31-10:

Pearl Total Return Fund began in 1972 and has been investing in mutual funds for 37 years.

Pearl Total Return Fund

Performance Summary. Past performance does not predict future performance.

- **Pearl Total Return Fund** had a **+ 5.59%** total return for the first 3 months of 2010.
- During the **5 years** through March 31, 2010, **Pearl Total Return Fund** was **up 20.33%** while the 3 comparison indexes were up 13.40% on average. See page 1. During the **10 years** through March 31, 2010, **Pearl Total Return Fund** was **up 72.26%** while the 3 comparison indexes were down 2.00% on average. (not annualized)
- **Pearl Total Return Fund** outperformed all 3 comparison indexes during the 5 years and 10 years through March 31, 2010. We believe this outperformance is significant because (a) it was achieved during both rising and falling stock markets, and (b) usually less than 80% of this Fund's total assets were invested in stocks, as measured by the holdings of the mutual funds in the Fund's portfolio. The 3 comparison indexes always consist of 100% stocks.
- Your Fund's total return was **+ 26.05%** in 2009, **- 38.67%** in 2008, **+ 10.37%** in 2007, **+ 20.67%** in 2006, **+ 11.55%** in 2005, **+ 16.83%** in 2004, **+ 35.73%** in 2003, **- 10.75%** in 2002, **+ 3.13%** in 2001, **+ 1.56%** in 2000, and **+ 26.99%** in 1999.
- **Pearl Total Return Fund** outperformed the Standard & Poor's 500 Index for **9 straight years** — each year from 1999 through 2007 — and slightly underperformed it in 2008 and 2009.
- **All Pearl Funds performance figures are after deducting all expenses** (all fees, transaction costs, etc.) — including all expenses of your Fund and all expenses of all the mutual funds in its portfolio. In contrast, the total returns of indexes do not reflect any expenses.

Net Asset Value and Net Assets of **Pearl Total Return Fund** at March 31, 2010:

NAV (net asset value) per share: \$10.57 — up from \$10.01 (after dividends) at 12-31-09

Net assets: \$81,827,916 — up from \$78,581,535 at 12-31-09

No-Load Investing. No Transaction Costs. Your **no-load** Fund is a **no-load** investor, seeking to **prevent all transaction costs** for you and all our shareholders. When the Fund invests in a load fund, the purchase is large enough to receive a 100% waiver of sales load, so the Fund buys without paying any load. The Fund is authorized to pay a low sales load or redemption fee (not exceeding 2%, combined), but we work hard to avoid this. The Fund does **not** impose any distribution fee (12b-1 fee). Some mutual funds in which the Fund may invest may impose a 12b-1 fee.

Pearl Total Return Fund has not paid any sales charge, commission, or redemption fee since 1998. **All** of its investments in the years 1999 through 2010 to date were made on a **no-load** basis.

Did you know?

Both Pearl Funds are long-term investors, not traders.

We change investments when we believe this is in our shareholders' interest, but we work to avoid excessive portfolio turnover.

Pearl Total Return Fund's portfolio turnover was 82% in 2009, 50% in 2008.

Pearl Aggressive Growth Fund's turnover was 57% in 2009, 36% in 2008.

Pearl Total Return Fund

Access to Many Funds. Your Fund's investments in most mutual funds have been consistently large enough to take advantage of 100% sales load waivers on large purchases. Thus, the Fund is able to select its investments from a very wide range of funds, without paying any sales load — even though many of those funds would require most investors to pay a sales load.

Investments. **Pearl Total Return Fund** is a **diversified fund of funds** that seeks **long-term total return** by being primarily invested (80% or more of net assets) in equity mutual funds, except when Management believes a lower percentage is justified by high risks affecting stock markets. This Fund seeks to limit shareholders' risk by usually holding a modest defensive position and by selecting some mutual funds that have had relatively low volatility in the past.

At March 31, 2010, 98.5% of **Pearl Total Return Fund's** total assets were invested in a diversified group of equity mutual funds, 1.1% in a high-quality bond fund, and 0.4% in cash. Nearly all of the cash was held in money market mutual funds.

A more precise way to measure your Fund's asset allocation is its **investment portfolio assets breakdown**, which counts the Fund's indirect investments through the mutual funds held in its portfolio, using recent information on the portfolio assets of those mutual funds.

At March 31, 2010, **Pearl Total Return Fund's** investment portfolio assets breakdown was: 88% stocks (including 46% U.S. and 42% foreign stocks), 3% bonds, 7% cash, and 2% other. Your Fund's asset allocation varies when the Fund changes its investments in mutual funds and when those funds change their investments.

Pearl Total Return Fund continues to be primarily invested in a broad, diversified mixture of equity mutual funds which own a variety of U.S. and foreign stocks; small-cap, mid-cap, and large-cap stocks; and value-style, blend-style, and growth-style stocks.

Recent month-end portfolio holdings are listed at www.pearlfunds.com. Portfolio holdings are subject to change at any time without notice, and some changes have been made since March 31, 2010. The Fund's portfolio holdings will be at least slightly different, and may be significantly different, by the time you read this report.

Net assets: \$43,005,773 — up from \$41,455,158 at 12-31-09

No-Load Investing. No Transaction Costs. Your **no-load** Fund is a **no-load** investor, seeking to **prevent all transaction costs** for you and all our shareholders. When the Fund invests in a load fund, the purchase is large enough to receive a 100% waiver of sales load, so the Fund buys without paying any load. The Fund is authorized to pay a low sales load or redemption fee (not exceeding 2%, combined), but we work hard to avoid this. The Fund does **not** impose any distribution fee (12b-1 fee). Some mutual funds in which the Fund may invest may impose a 12b-1 fee.

Pearl Aggressive Growth Fund has never paid any sales charge, commission, or redemption fee. All of its investments to date were made on a **no-load** basis.

Did you know?

Both Pearl Funds are **flexible**, investing in a mixture of mutual funds with different investment styles: small-cap, mid-cap, and large-cap; value, blend, and growth; U.S. and foreign.

We change the mixture when we believe this is in our shareholders' interest.

Pearl Aggressive Growth Fund

Access to Many Funds. Your Fund's investments in most mutual funds have been consistently large enough to take advantage of 100% sales load waivers on large purchases. Thus, the Fund is able to select its investments from a very wide range of funds, without paying any sales load — even though many of those funds would require most investors to pay a sales load.

Investments. **Pearl Aggressive Growth Fund** is a **diversified fund of funds** that seeks **long-term aggressive growth of capital** by being fully invested (95% or more) in equity mutual funds at all times. This Fund almost never takes a temporary defensive position, although it has the ability to do so if Management determines that extreme circumstances exist.

At March 31, 2010, 99.4% of this Fund's total assets were invested in a diversified group of equity mutual funds, and 0.6% in cash (mostly in money market mutual funds).

In comparison with **Pearl Total Return Fund**, **Pearl Aggressive Growth Fund's** portfolio as a whole is more volatile and is more heavily weighted toward stocks.

Pearl Aggressive Growth Fund's investment portfolio assets breakdown counts the Fund's indirect investments through the mutual funds held in its portfolio, using recent information on the portfolio assets of those mutual funds.

At March 31, 2010, **Pearl Aggressive Growth Fund's** investment portfolio assets breakdown was: 93% stocks (including 35% U.S. and 58% foreign stocks), 1% bonds, and 6% cash. Your Fund's asset allocation varies when the Fund changes its investments in mutual funds and when those funds change their investments.

1. Mail to 32500 El Diente Court, Evergreen, CO 80439 (preferred method)
2. Telephone 303-679-9689

Performance is historical and does not guarantee future results. Investment return and principal value of an investment in each Pearl Fund will fluctuate, so an investor's shares in the Fund, when redeemed, may be worth more or less than their original cost. Performance changes over time and may be materially different by the time you read this report. For recent information on performance, prices, and portfolio holdings, go to www.pearlfunds.com or call toll-free 866-747-9030.

All investments involve risk. Even though **Pearl Total Return Fund** and **Pearl Aggressive Growth Fund** each invest in many mutual funds, that investment strategy cannot eliminate risk.

Many factors affect risks of mutual funds that invest in various kinds of stocks. For example:

Stocks of small and mid-sized companies may be more volatile or less liquid than stocks of larger companies. Smaller companies may have a shorter history of operations, may not have the ability to raise capital as easily as large companies, and may have a less diversified product line, making them more susceptible to market pressure.

Value stocks include stocks of companies that may have experienced adverse business or industry developments or may be subject to special risks that have caused the stocks to be out of

favor and undervalued. Growth stocks are stocks of companies believed to have above-average potential for growth of revenue and earnings. Prices of growth stocks may be more sensitive to changes in current or expected earnings than prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general.

Investments in foreign securities involve risks, including currency fluctuation, different regulation, accounting standards, trading practices, levels of available information, generally higher transaction costs, and political risks. The risks of foreign investments are typically increased in less developed countries, which are sometimes referred to as emerging markets. For example, political and economic structures in these countries may be new and developing rapidly, which may cause instability. These countries are also more likely to experience high levels of inflation, deflation, or currency devaluations, which could hurt their economies and securities markets.

For more detailed information on the risks of investing in the Funds, please read the Prospectus, available at www.pearlfunds.com or by calling 866-747-1930 (toll-free).

Total return means total growth of the investment, with all dividends (including capital gains dividends) reinvested.

Expenses. Each Pearl Fund is a fund of funds which bears its allocable share of the expenses of the mutual funds in which it invests. Each Fund is thus subject to two levels of fees and a potentially higher expense ratio than would be associated with an investment in a fund that invests directly in stocks or other financial instruments. However, **all Pearl Funds performance and total return figures are net, after deducting all expenses (all fees, transaction costs, etc.) — including all expenses of all the mutual funds in your Fund's portfolio.**

For the year 2009, each Fund's total annual fund operating expenses, including the Fund's share of all expenses of all the mutual funds in its portfolio, were: **Pearl Total Return Fund** 2.18%, which was reduced to 1.89% by the Manager's reimbursement due to the Limit on Expenses; and **Pearl Aggressive Growth Fund** 2.50%, reduced to 2.15% by the Manager's reimbursement. However, **all Pearl Funds performance and total return figures are net, after deducting all expenses** (all fees, transaction costs, etc.) — including all expenses of all the mutual funds in your Fund's portfolio.

Limit on Expenses. Pearl Management Company, the Funds' Manager, has contractually agreed to reimburse each Pearl Fund for all ordinary operating expenses (including all management, advisory, and administrative fees) exceeding 1.20% of a Fund's average net assets. When the Manager has reimbursed a Fund for expenses in excess of this limit, the Manager may recover the reimbursed amounts, for a period that does not exceed five years, to the extent this can be done without exceeding the expense limit. The Manager may continue to recover amounts reimbursed under the Funds' previous contractual expense limit, but only to the extent this can be done without exceeding the previous expense limit. The expense limit applies to each Fund's direct ordinary operating expenses and does not apply to the indirect expenses incurred by a Fund through its investment in the mutual funds in its portfolio. The expense limit does not have an expiration date, and will continue unless a change is approved by the Funds' Board of Trustees.

The Manager's reimbursement of expenses that exceed the expense limit lowers the expense ratio and increases the overall return to investors.

Disclosure of Portfolio Holdings. Pearl Funds' most recent month-end portfolio holdings are disclosed to the public at www.pearlfunds.com. The Funds also file a complete schedule of portfolio holdings with the SEC for the first and third quarters of each year on Form N-Q, and for the half-year and full year on Form N-CSR. The Forms N-Q and N-CSR are available on the SEC's Website at

www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Proxy Votes by the Funds. A description of each Fund's proxy voting policies and procedures and a record of each Fund's proxy votes for the most recent 12-months period ended June 30 are available without charge at www.pearlfunds.com or by calling toll-free 866-747-9030, and are also available on the SEC's Website at www.sec.gov.

Privacy Policy. Because we consider the preservation of your privacy a priority, Pearl Mutual Funds has a privacy policy. You may view the privacy policy at www.pearlfunds.com (click on Privacy Policy) or by calling toll-free 866-747-9030. The privacy policy is sent to shareholders annually.

Comparison Indexes. The Dow Jones Wilshire 5000 Composite Index (Full Cap), often referred to as Dow Jones Wilshire 5000, is an unmanaged index that is market-capitalization weighted, includes all publicly-traded U.S. common stocks headquartered in the U.S. with readily available price data, and is generally representative of the performance of the average dollar invested in U.S. common stocks. The MSCI World Index is an unmanaged index, is market-capitalization weighted, and is generally representative of the performance of the global (U.S. and international) market for common stocks. The Standard & Poor's (S & P) 500 Index is an unmanaged index of 500 stocks, is market-capitalization weighted, and is generally representative of the performance of larger companies in the U.S.

The Funds' holdings are not the same as the indexes. Each Pearl Fund's performance will not mirror the returns of any particular index. It is not possible to invest directly in an index.
