Expenses. Pearl Total Return Fund's total net expenses, after reimbursement by the Manager, were **0.98%** (annualized) of the Fund's average net assets during the first 9 months of 2005. See Limit on Expenses, page 8. We believe this 0.98% expense ratio is one of the lowest for all funds of its type (actively-managed independent fund of funds) in the U.S.

Pearl Total Return Fund

All of your Fund's performance figures are after deduction of all expenses (all fees, transaction costs, etc.) — including all expenses of your Fund and all expenses of all the mutual funds in its portfolio.

Access to Many Funds. Your Fund's investments in most mutual funds are generally large enough to take advantage of sales load waivers on large purchases. Thus, the Fund is able to select **no-load** investments from a very wide range of funds — even though many of those funds would require most investors to pay a sales load.

Another potential benefit to our shareholders is that this Fund also owns shares of some mutual funds that are **closed** to most new investors. At September 30, 2005, **Pearl Total Return Fund** held 14 equity mutual funds and 7 of them were closed to most new investors.

Risk-adjusted Return. **Pearl Total Return Fund** seeks to outperform the 3 benchmark indexes on a long-term risk-adjusted total return basis. Two factors should be considered together in assessing a mutual fund's performance: its total return and its risk. Therefore, we measure your Fund's total return in relation to the risk (volatility) it incurred, and then we compare the risk-adjusted total returns of the Fund and its 3 benchmark indexes. For information on your Fund's risk-adjusted total return, see our 2004 Annual Report or our 2005 Semi-Annual Report.

Investments. **Pearl Total Return Fund** is a **diversified fund of funds** that seeks long-term total return by being primarily invested (80% or more of net assets) in equity mutual funds, except when Management believes a lower percentage is justified by high risks affecting stock markets. This Fund seeks to limit shareholders' risk by frequently holding a modest defensive position and by selecting some mutual funds that have demonstrated relatively lower volatility.

At September 30, 2005, 89% of **Pearl Total Return Fund's** total assets were invested in equity mutual funds (a diversified group of funds investing in U.S. and international markets), 1.5% in income funds that primarily hold bonds, and 9.5% in cash.

A more precise way to measure your Fund's asset allocation is its investment portfolio asset breakdown, which counts the Fund's indirect investments through the mutual funds held in its portfolio, using recent information on the portfolio assets of those mutual funds.

At September 30, 2005, **Pearl Total Return Fund's** investment portfolio asset breakdown was: 75% stocks (including 29% U.S. and 46% foreign stocks), 3% bonds, 18% cash, and 4% other. The Fund's asset allocation and portfolio holdings vary with changes in investments.

Pearl Total Return Fund continues to be mostly invested in equity mutual funds. We diligently seek to select the best mutual funds in view of changing market conditions and this Fund's investment objective. We believe your Fund's current investments are appropriate for this market environment.

Recent portfolio holdings are available at www.pearlfunds.com. Portfolio holdings are subject to change at any time without notice, and changes have been made since September 30, 2005.

2. Telephone to 303-679-9689

Limit on Expenses. Pearl Management Company, the Funds' Manager, has contractually agreed to reimburse each Pearl Fund for all ordinary operating expenses (including management and administrative fees) exceeding these expense ratios: 0.98% of a Fund's average net assets up to \$100 million and 0.78% in excess of \$100 million. When the Manager has reimbursed a Fund for expenses in excess of this limit, the Manager may recover the reimbursed amounts, for a period that does not exceed five years, to the extent this can be done without exceeding the expense limit. This expense limit does not have an expiration date, and will continue unless a change is approved by the Funds' Board of Trustees.

The Manager's reimbursement of expenses that exceed the expense limit lowers the expense ratio and increases the overall return to investors.

Performance is historical and does not guarantee future results. Investment return and principal value of an investment in each Pearl Fund will fluctuate, so an investor's shares in the Fund, when redeemed, may be worth more or less than their original cost. Performance changes over time and may be materially different by the time you read this report. For recent information on performance, prices, and portfolio holdings, go to www.pearlfunds.com or call toll-free 866-747-9030.

All investments involve risk. Even though **Pearl Total Return Fund** and **Pearl Aggressive Growth Fund** each invest in many mutual funds, that investment strategy cannot eliminate risk.

Many factors affect risks of mutual funds that invest in various kinds of stocks. For example:

Stocks of small and mid-sized companies may be more volatile or less liquid than stocks of larger companies. Smaller companies may have a shorter history of operations, may not have the ability to raise capital as easily as large companies, and may have a less diversified product line, making them more susceptible to market pressure.

Value stocks include stocks of companies that may have experienced adverse business or industry developments or may be subject to special risks that have caused the stocks to be out of favor and undervalued. Growth stocks are stocks of companies believed to have above-average potential for growth of revenue and earnings. Prices of growth stocks may be more sensitive to changes in current or expected earnings than prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general.

Investments in foreign securities involve risks, including currency fluctuation, different regulation, accounting standards, trading practices, levels of available information, generally higher transaction costs, and political risks. The risks of foreign investments are typically increased in less developed countries, which are sometimes referred to as emerging markets.

Total return means total growth of the investment, with all dividends and distributions (including capital gains) reinvested.

Privacy Policy. Because we consider the preservation of your privacy a priority, Pearl Mutual Funds has adopted a privacy policy. You may view the privacy policy at www.pearlfunds.com (click the Privacy Policy page) or by calling toll-free 866-747-9030.

The Funds also file a complete schedule of portfolio holdings with the SEC for the first and third quarters of each year on Form N-Q, and for the half-year and full year on Form N-CSR. The Funds' Forms N-Q and N-CSR are available on the SEC's Website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Comparison Indexes. The Dow Jones Wilshire 5000 Composite Index (Full Cap), commonly referred to as Dow Jones Wilshire 5000 (Full Cap), is an unmanaged index that is market-capitalization weighted, includes all publicly-traded U.S. common stocks headquartered in the U.S. with readily available price data, and is generally representative of the performance of the average dollar invested in U.S. common stocks. The MSCI World Index is an unmanaged index that is market-capitalization

weighted and is generally representative of the performance of the global (including U.S. and international) market for common stocks. The Standard & Poor's (S & P) 500 Index is an unmanaged index of 500 stocks that is market-capitalization weighted and is generally representative of the performance of larger companies in the U.S. The Funds' holdings are not identical to the indexes. Each Pearl Fund's performance will not mirror the returns of any particular index. It is not possible to invest directly in an index. Trademarks and copyrights relating to the indexes are owned by: Dow Jones Wilshire 5000 (Full cap): Dow Jones Indexes and Wilshire Associates, Inc; MSCI World Index: Morgan Stanley Capital International; Standard & Poor's 500 Index: The McGraw Hill Companies.
